ATLETISMO ESPAÑOL
LISTA MASCULINA DE MARCAS DE TODOS LOS TIEMPOS AL 31.12.65

1 - INTRODUCCION

A finales de los sesenta el grupo checoslovaco START comenzó su extraordinaria labor atlético-estadística. Una de sus facetas era la realización de amplias listas mundiales -aparte de checas- de marcas y o performances. Para cada boletín solían elegir una prueba cualquiera. Según el tope elegido a la vista de los atletas que entraban en el mismo, cuando había algún atleta español involucrado, Vladimír Visek -el principal elemento en aquellos años- recurría a mí para que le facilitara sus marcas por encima del citado tope.

Naturalmente como este tope era alto para nuestro nivel, siempre había que retroceder solamente algunos años en busca de marcas (únicamente en la prueba en cuestión) lo que era ciertamente algo molesto y trabajoso pero no demasiado, dada la rapidez de búsqueda derivada de su concreción.

Cada vez que el colega checo me hacía una petición de esta naturaleza (otro tipo de informaciones lógicas eran las de cada temporada que no exigían búsquedas retrospectivas) había que repetir la consabida averiguación.

Ello me indujo a tomar la decisión lógica e inevitable : hacer una lista de marcas de todas las pruebas y así poder responder en el acto a cualquier futura petición checa.

Fue en Marzo de 1972 cuando comencé con esta búsqueda de marcas. Me señalé unos toques totalmente arbitrarios (a ojimetro como suele decirse) y revise completamente la revista ATLETISMO ESPAÑOL -que iba ya por el número 200- así como el boletín ATLETISMO de la Federación Catalana (hasta 1961 se publicaron 210 números, luego se interrumpió y se reanudó en 1964 con periodicidad bimensual hasta 1965, luego lo perdí de vista).

Hecha la revisión hasta 1965 había llenado un cuaderno (cada prueba una hoja con letra pequeña). Los años 1966-67-68 ocuparon otro y los años 1969-70 un tercero. En adelante me pareció más apropiado ocupar un cuaderno por año aunque no se llenasen las hojas de ninguna prueba.

Me he permitido esta breve disquisición personal para justificar en parte el título del presente trabajo. 1965 aparte de ser el año final compilado en mi primer cuaderno, es el año en que Tomás Barris colgó los clavos. Barris fue el primer atleta español que compitió habitualmente en el extranjero (principalmente Escandinavia y Alemania desde 1957) aunque sus actuaciones en Campeonatos de Europa (1958 y 1962) y Juegos Olímpicos (1960) no fueran brillantes.

Es decir que 1965 supone en cierta manera el fin de una época. A partir de 1966 el nivel del atletismo español alcanza ya unas cotas cada vez más altas siendo su progreso ya imparable (en realidad éste se aceleró desde 1964).

En 1973 al compilar 1972 y a principios de 1974 al hacerlo con 1973 no tuve más remedio que ir modificando los toques notablemente -en años anteriores la modificación fue parcial y menos ostensible- por dos motivos, el primero el progreso imparable del nivel general que quitó significación a resultados importantes una década atrás, y el segundo que la recogida de performances en el prácticamente único medio de información utilizado (la revista ATLETISMO ESPAÑOL) era cada vez más problemática y me obligó a abandonar este tipo de compilación desde 1974.

Por ello me ha parecido más lógico dividir el trabajo en dos grupos el primero que abarca hasta 1965 inclusive (que es el que ahora se publica) con unos topes elegidos en 1972 que resultaron claramente cortos en algunas disciplinas (como 15.0 en 110 vallas y 2 mts. en altura) aunque hasta 1973 si fueran suficientes, y en otras excesivos y que hubo que ir abandonando a partir de 1966 y sobre todo de 1970.

El segundo grupo (cuya publicación queda para otra ocasión) son las listas anuales desde 1966 hasta 1973 inclusive. Su presentación se hará por pruebas (año a año) en vez de por años (prueba a prueba) para que se aprecie mejor su progreso (el tope de marcas irá variando).

Lógicamente si la lista hubiese sido a 31.12.73, los topes elegidos hubieran dejado fuera cientos de marcas que si se incluyen en la lista a fin de 1965. Entiendo que se trata precisamente de divulgar como se merecen estos resultados que el progreso posterior hubiera relegado al olvido de haber copado por la primera alternativa.

En pruebas combinadas, dado el desbarajuste producido por el uso de diferentes tablas de puntuación, ha sido necesario presentar el ranking por atletas (no alfabético sino atendiendo a su mejor marca).

No me ha parecido útil la conversión a la tabla actual (1984-85) tratándose de una lista hasta 1965, máxime cuando hay poquitos decatlones puntuados directamente con la tabla 1962 (se recordará que no se divulgó hasta 1964).

Creo que con tres tablas (1934-52-62) es suficiente. Naturalmente esos últimos decatlones citados en el párrafo anterior sólo están puntuados por la tabla 1962. Los de los años cincuenta en general están debidamente convertidos a la tabla 1962, mientras que los del periodo anterior (décadas treinta y cuarenta y principios de los cincuenta) están convertidos (también en general) a la de 1952 e incluso -a veces- a la de 1962.

Aunque ya se ha expresado cuales han sido las fuentes de información principales -a menudo únicas- o sea la revista ATLETISMO ESPAÑOL y el boletín ATLETISMO, vuelvo ahora a indicarlo para que se comprenda cuál es el grado de perfección que puede esperarse de estas listas (se podría hablar de porcentaje de recogida de marcas) aparte de los errores que haya podido cometer al hacer la compilación en 1972-73-74 y ahora en 1994 al introducir los datos en el ordenador.

Téngase en cuenta que si por ejemplo un atleta cualquiera, digamos el velocista Sánchez Paraiso, corrió en 1968 supongamos 25 veces los 100 y 15 los 200, haciendo -según el ejemplo- 10.6 ó menos y 21.9 ó menos 16 y 12 veces respectivamente, y según mis precarias informaciones sólo he conseguido enterarme de 13 tiempos con tope de 10.6 y otros 9 con tope de 21.9, el porcentaje de recogida de marcas (en total) es del orden del 73 % (22 marcas compiladas sobre 30 realizadas) en el conjunto de ambas distancias.

Si esto ocurre con un atleta destacado cuyo rastro la revista federativa sigue con cierto interés especial (lo mismo podríamos decir de cualquier otro atleta de importancia como Areta, Garriga o Sola si nos referimos a los saltos) podemos imaginar lo que pasa con un atleta que está en los límites del tope. Este atleta si por ejemplo hace 3 ó 4 marcas sólo hay garantías de conocer una (la que figura en el ranking del año) ó dos si una de sus restantes mejores actuaciones la realiza en el Campeonato Nacional, con lo que el porcentaje de recogida de marcas puede ser del 25 ó 33 por ciento (el 50 % en el mejor de los casos).

Aunque esto pueda parecer una obviedad (que lo es) me ha parecido muy apropiado dejar constancia expresa de ello.

En resumen, se trata de una lista de marcas que no puede tener de ninguna manera pretensiones de ser exacta, completa o fiable -cualquier término valdria- y que aspira a ser una base sobre la que los colegas que tengan informaciones más amplias puedan facilitar addendas en abundancia.

Me podria dar por satisfecho si en las zonas mejores (30 ó 50 primeras marcas, según pruebas) el porcentaje de fiabilidad o exactitud alcanza el 80 %. El hecho de que a veces, siempre según pruebas y perdón por la repetición, se haya conseguido rebasar el 90 % (eso espero en alguna distancia como los 1500), no invalida esta afirmación o sospecha de que cada cinco marcas, una probablemente no se ha captado.

En cuanto a las zonas peores proximas al tope, el porcentaje bajara hasta un nivel que podríamos cifrar alrededor del 60 %, aunque a veces incluso se acerque al 50 %, por debajo del cual no tendria sentido, en mi opinión, publicar un trabajo estadístico.

Digo todo esto porque una de las posibilidades que he barajado ha sido la de ofrecer a los colegas de la AEEA solamente la zona buena (en general las 50 primeras marcas), pero por fin he tomado la decisión de divulgar también ese otro tramo del que podria haber prescindido (por ejemplo en 5000 el grupo de marcas -sesenta- que va de la centésima a la última, es decir entre 14.32 y 14.39).

Quiero rendir tributo con estas largas compilaciones en las distancias comprendidas entre 800 y 10000 (y steeple) a aquel admirable grupo de mediofondistas-fondistas de finales de los años cincuenta (aunque su actividad se prolongase en los sesenta) capitaneados por Barris, que los buenos aficionados de la época recordamos con gran afecto (por orden alfabético éste seria el quinteto mas representativo : Alonso, Amoros, Garcia, Molins y Perez).

La falta de espacio impide que estas listas de marcas se presenten también por orden alfabético. Sin embargo si he querido al menos recoger las de Tomás Barris (más de 150 marcas en total, de ellas 82 en su distancia preferida los 1500).

En la Revista ATLETISMO ESPAÑOL número 215 de Marzo-73 además de las 100 mejores marcas de Areta en triple (página 43) en la página 41 se recogian las 100 mejores carreras de Barris (exactamente 101 marcas) con topes algo mejores lógicamente. En aquel momento sólo pude consultar la revista completa desde 1960 (tenia números sueltos anteriores) lo que motivó que mi colega Agustín Jaureguizar encontrase una decena de marcas que me faltaban (aparecieron citadas en el número 217 de Mayo-73, pág.9) todas ellas de las giras nórdico-germanas.

Cuando a finales de los ochenta Antonio Hoyos de Castro puso a mi disposición su colección, pude consultar el periodo 1957-58-59 y localicé no sólo las addendas que me habia facilitado Jaureguizar sino también otras de carreras disputadas en nuestro país (y no sólo de Barris) lo que me ha permitido ahora ampliar los topes y mejorar el contenido de la compilación que hoy me satisface presentar a mis amigos estadísticos.

En la introducción de esta estadística a 31.12.65 se hace referencia al periodo 1966-73 indicando que la presentación de las listas será prueba a prueba por años y no año a año por pruebas.

Creo que no está de más, a modo de anticipo, facilitar esta pequeña muestra que abarca los tres primeros años (1966-67-68) de la primera prueba (100 metros) que ilustra perfectamente lo manifestado en dicha introducción en cuanto a Sánchez Paraiso en 1968.

A la vista de estas compilaciones (tope 10.6) el lector puede percatarse de que el porcentaje de recogida de marcas varía de unos años a otros, aun teniendo en cuenta que el nivel de calidad también cambia.

ATLETISMO ESPAÑOL

LISTA FEMENINA DE MARCAS DE TODOS LOS TIEMPOS AL 31.12.65

- INTRODUCCION

El atletismo femenino español, tras largos años de inexistencia, arranca a principios de los sesenta, por lo que el año 1965 -que para el atletismo masculino supone ya haber dejado atrás un período importante en todos los órdenes- para las chicas en realidad no va más allá de ser un bienio o a lo sumo un trienio (poquísimos resultados hasta 1962).

Aunque es en Noviembre-59 en Barcelona cuando las pioneras catalanas se ponen en marcha, no se puede hablar de atletismo femenino español hasta la primavera de 1963, cuando comienzan las primeras competiciones en otras provincias como preparación del primer campeonato nacional femenino de esta segunda época (en la primera ya los hubo entre 1931 y 1935) que se disputa en Barcelona el 17 y 18 de agosto de 1963, es decir simultáneamente con el masculino.

En el boletín número 29 de la A.E.E.A. (julio-93) en el trabajo "El atletismo español joven" (Introducción femenina, páginas 193 a 196) ya expliqué suficientemente lo relativo a las dificultades de compilación, por lo que nos podemos aquí limitar a recordar que el primer ranking femenino se publica en 1964 con tope de 50 atletas, pero hay que esperar hasta 1966 para ver incluido el año de nacimiento de las atletas (en hombres dicha fundamental información ya apareció desde 1964), lo que explica que en nuestras listas haya atletas sin este dato, lo que quiere decir que su retirada ya se había producido para entonces.

Dado que las estadísticas de marcas precisan por parte de las fuentes de información de un apropiado seguimiento de toda clase de competiciones donde se producen resultados destacados (en este período prácticamente mi única fuente es la revista ATLETISMO ESPAÑOL), todo lo dicho en la introducción masculina sobre las dificultades y carencias de la recogida de marcas, se queda corto si lo trasladamos al incipiente atletismo femenino.

Todos sabemos que el interés suscitado por las competiciones masculinas siempre ha sido muy superior y más en España en la época que nos ocupa. De ahí que estas estadísticas femeninas tengan un porcentaje de recogida de marcas notoriamente más bajo que las masculinas.

Aun así he considerado imprescindible -siempre huyendo del agravio comparativo que supondría no hacerlo- que estos siete breves folios de resultados de nuestras pioneras acompañen los extensos cincuenta que detallan la aportación masculina a nuestra historia hasta 1965.
