

PROGRESIÓN DEL RÉCORD DE EUROPA EN PISTA CUBIERTA

PROGRESSION OF THE EUROPEAN INDOOR RECORD

José María García

Presidente de Honor de la Asociación Española de Estadísticos de Atletismo - AEEA

En 1986 con ocasión del Campeonato de Europa en Madrid, la RFEA decidió publicar un libro, cuya compilación la realizamos tres estadísticos españoles (Alberto Sánchez Traver, Manuel Villuendas y un servidor de Vdes.). Como el ámbito era triple (Mundo, Europa, España) y la temática era diversa (cronología récords, listas de todos los tiempos, historiales de los Campeonatos, etc.), nos dividimos la tarea, aunque nos ayudásemos unos a otros. Por mi parte puedo decir que me concentré principalmente en las cronologías de los récords.

A pesar de que la competición era sólo europea, quise aprovechar para incluir también el ámbito mundial, como ya se ha dicho, recogiendo no sólo las pruebas oficiales sino todas las distancias en metros y yardas (y kilómetros y millas), para lo que me pareció útil incluir también equivalencias en distancias métricas e inglesas para una mejor evaluación de cada resultado.

Las fuentes fundamentales fueron los rankings anuales -masculinos- desde 1951 hasta 1977 de Marco Martini y las publicaciones del grupo START de Checoslovaquia desde 1969 hasta 1979, con la misma profundidad en hombres y mujeres; otras fuentes citadas en su día no procede repetir las aquí. En la cronología sólo recogí deliberadamente un período reducido (los últimos 20, 25 ó 30 años, según pruebas), habiendo recibido bastantes adendas y algunas correcciones de varios colegas extranjeros, principalmente de Vladimir Jorda, checo, y Eric Cowe, británico (este último sólo en el campo femenino).

En 1987 Martini, publicó unas cronologías, también con triple ámbito (en este caso lógicamente Mundo, Europa, Italia) pero más ambiciosas que las nuestras, puesto que recuperaba informaciones más antiguas (de los años veinte e incluso anteriores).

Las publicaciones posteriores (Italia 1992, Francia 1994, Austria 2002) en cuanto a cronología se refiere se han limitado, en general, a agregar los resultados de los últimos años, aunque con alguna recuperación de marcas anteriores (los compiladores ya se citan en la introducción general). Ahora nuestro trabajo ha seguido los siguientes pasos:

- a) Revisión de la cronología moderna (referencia fundamental ha sido las listas anuales de marcas y atletas de nuestro colega Félix Capilla, de Valencia, publicadas en los boletines de la AEEA desde 1987 hasta 2004, habiendo también utilizado las del grupo checo START desde 1986 hasta 1990).
- b) Consulta de nuevas fuentes.

In 1986, on the occasion of the European Indoor Championships which took place Madrid, the RFEA decided to publish a book, whose compilation was made by three Spanish statisticians (Alberto Sánchez Traver, Manuel Villuendas and me). As it concerned three competitions (World, European, Spanish) and the contents were diverse (chronology of records, all time lists, history of championships, etc..) we shared the work, although we assisted each other. I focused my efforts in the chronology of records.

Although it was an European competition, I took this opportunity to include the world field, as it was previously said, with official events and all distances in metres and yards (and kilometres and miles), and I thought it would be useful to include metrical and English distances in order to evaluate each result in a better way.

The main sources were the annual rankings -men- since 1951 until 1977 by Marco Martini and the publications of the Group START from Czechoslovakia since 1969 until 1979, including the same details for men and women; other sources previously mentioned are not going to be repeated. In this chronology I only included a reduced period (the last 20, 25 or 30 years, depending on the events), having received several corrections from foreign colleagues, mainly from Vladimir Jorda (CZE) and Eric Cowe (GBR) (this one only sent information concerning women).

In 1987 Martini, published chronologies, also about the three fields (logically, World, European and Italian) but it was more ambitious than us, as it recovered older information (from the 20's and even before).

The following publications (Italy 1992, France 1994, Austria 2002), talking about chronology, have been limited, in general, to add results of the last years, although with some recovery of previous marks (compilers have already been mentioned in the general introduction).

Now our work has been made as follows:

- a) Review of the modern chronology (as basic reference we have used marks and athletes annual lists by Felix Capilla, from Valencia, published in the AEEA bulletins since 1987 until 2004, and the Czech group START since 1986 until 1990).
- b) Consultation of new sources
 - b.1) 4 books of several compilers chaired by Roberto L. Quercetani, with annual lists since 1921 until 1950 (outdoor, but with indoor times) published between 1986 and 1997.
 - b.2) Hubert Hamacher's book, with annual lists since 1891 until 1900 (also outdoor, but with some indo-

PROGRESIÓN DEL RÉCORD DE EUROPA EN PISTA CUBIERTA

b-1) 4 libros de varios compiladores dirigidos por Roberto L. Quercetani, con listas anuales desde 1921 hasta 1950 (al aire libre, pero que incluyen marcas en pista cubierta) publicados entre 1986 y 1997.

b-2) libro de Hubert Hamacher, con listas anuales desde 1891 a 1900 (como en el caso anterior, al aire libre, pero con algunos resultados en pista cubierta).

b-3) cronología alemana de p.c. hasta 1978 compilada por Siegfried Banse (enviada por Klaus Amrhein).

b-4) boletines alemanes (DGLD) números 38 al 41 (éste último de noviembre de 2004) publicados en los dos últimos años, con la cronología completa -de p.c.- desde 50 hasta 1000 metros, compilada por Otto Verhoeven (con comienzo anterior al de la publicación de Banse), lo que ha permitido perfeccionar los historiales de varias pruebas completando o/y corrigiendo datos de marcas que tenían versiones contradictorias, además de incorporar una serie de adendas.

c) Redacción de una lista de diferencias entre diversas fuentes de información (tanto de marcas como de fechas) con consultas a diversos colegas extranjeros para confirmación de determinados resultados no recogidos en varias de las fuentes habituales. Peter Lovesey nos ha ayudado con informaciones sobre las actividades británicas en pista cubierta en el siglo XIX.

Otto Verhoven nos ha remitido una serie de marcas alemanas antiguas desconocidas, a partir de 1500 metros (hasta la distancia de 1000 metros ya he tratado en el apartado anterior) que reescriben la historia europea de algunas pruebas, por lo que le quedamos muy agradecidos (por ejemplo en 4x400 metros nos agrega 11 marcas entre 1922 y 1961, año inicial de nuestra lista previa).

d) Por último hemos utilizado la vía oficial (José Luis Hernández desde la Federación Española de Atletismo) contactando con varias Federaciones de países europeos con consultas sobre marcas realizadas en sus países, consultas que en varios casos no han sido contestadas, lo que nos ha impedido culminar nuestra investigación como hubiéramos deseado.

Algunos colegas de la AEEA también han aportado su colaboración, como José Javier Etayo que ha rastreado en publicaciones inglesas y ha encontrado marcas antiguas en saltos, mientras que Francisco Ascorbe y Félix Capilla han aclarado, confirmado o rechazado algunas marcas sobre las que había discrepancias.

Hay pruebas, pocas, en las que hay bastante confusión en algún período (por ejemplo altura femenina entre 1951 y 1957) que lamentablemente no hemos conseguido dilucidar.

No quiero terminar sin advertir que en estas cronologías se excluyen las marcas obtenidas en pistas de cuerda superior a 200m/220y (que los anglosajones llaman "oversized"). Estas pistas grandes naturalmente, como se sabe, sólo afectan lógicamente a las dis-

or results).

b.3) German indoor chronology until 1978 by Siegfried Banse (sent by Klaus Amrhein)

b.4) German bulletins (DGLD), numbers 38-41, published in the last two years, with the complete chronology - indoor- from 50 to 1.000 metres, by Otto Verhoeven (previous to the publication of Banse) which has allowed to improve the history of several events by completing or/and correcting information of contradictory versions, and the addition of various corrections.

c) List of differences between the several sources of information (marks and dates) with consultations to several foreign colleagues to confirm particular results which do not appear in some of the most usual sources. Peter Lovesey has collaborated with information about the British Indoor during the XIX Century. Otto Verhoven has sent a list of old unknown German marks , from 1500 metres on (up to 1000 metres was set out in the previous point) which rewrite the European history of some events, and we are very grateful to him for providing this information (for instance in the 4x400 metres he adds 11 marks between 1922 and 1961, first year of our previous list).

d) Lastly, and in an official way (José Luis Hernández from the Royal Spanish Athletics Federation) we have been in touch with several European federations requesting information about marks set in their countries, questions which in several cases did not have reply, and we could not finish our research as we would like to do it.

Some colleagues from the AEEA have also collaborated, like José Javier Etayo, who has investigated in British publications, and he has founded old marks in jump events, whereas Francisco Ascorbe and Felix Capilla have clarified, confirmed or rejected some dissenting marks.

There are few confusing events (for instance female high jump between 1951 and 1957) that we could not clarify.

I do not want to finish without saying that in these chronologies do not appear the marks achieved in tracks bigger than 200 m/220 yards (called oversized by the Anglo-Saxon). These big tracks, as they are commonly known, only concern distances between 200 metres and 3.000 metres. I think it is better to mention the most important ones, instead of including every distance. Under this situation are the marks of the French Jazy (3.42.6 in the 1500 in 1965 and 7.57.2 in the 3000 in 1964) and 4 marks from East Germany in the 200 between 21.1 and 20.9 (1976-1979) and the German Voss 6.283 in Heptathlon in 1985, etc. Concerning women, we have Koch in the 200 (22.63 in 1983 and 22.33 in 1986), Maletzki 51.9 in the 400m in 1976, both German, Kratochvilova from Czech Republic 51.02 in the 400 in 1981 and 1.58.33 in the 800 in 1983, 4 marks from East Germany, between 2.01.4 and 1.58.4 in the 800 (1976- 1982) and the German Behmer 4.995 in pentathlon in 1988, etc.

This introduction was written in February 2005 for the "European Indoor Handbook", published with occasion

PROGRESIÓN DEL RÉCORD DE EUROPA EN PISTA CUBIERTA

tancias desde 200 hasta 3000 metros. Creo que es mejor hacer aquí una breve relación de las más significativas, en vez de hacerlo en cada una de las distancias mencionadas. En esta situación están por ejemplo las marcas del francés Jazy (3.42.6 en 1500 en 1965 y 7.57.2 en 3000 en 1964) y 6 marcas germano-orientales en 200 entre 21.1 y 20.9 (años 1976 a 1979) y el alemán Voss 6.283 en heptathlon en 1985, etc. Entre las mujeres tenemos a Koch en 200 (22.63 en 1983 y 22.33 en 1986), a Maletzki 51.9 en 400 en 1976, ambas alemanas, a la checa Kratochvilova 51.02 en 400 en 1981 y 1.58.33 en 800 en 1983, otras 4 marcas germano-orientales entre 2.01.4 y 1.58.4 en 800 (años 1976 a 1982) y la alemana Behmer 4.995 en pentathlon en 1988, etc.

Introducción realizada en febrero de 2005 y publicada en el libro Europeo de la pista cubierta, realizado con ocasión del Europeo Indoor de Madrid 2005.

Para la revisión y actualización de este trabajo se ha tenido en cuenta preferentemente los trabajos sobre la progresión de los récords alemanes en pista cubierta realizado por el alemán Otto Verhoeven y publicados en los boletines de la DGLD.

of the 2005 European Indoor Athletics Championships.

The review and updating of this work has been made after taking into consideration the works about German indoor records progression by German Otto Verhoeven, published in different DGLD bulletins.

José María García

Las mejores marcas en pista cubierta comenzaron a homologarse oficialmente como Récords del Mundo y Récords de Europa desde el 1 de enero de 1987 - en negrita - Toda la lista está cerrada a 8 de marzo de 2015.

The best indoor performances on record were accepted as the inaugural IAAF World records and EAA European Records from January 1, 1987 -in bold-. All records are as at March 8, 2015

Tiempos oficiales publicados en décimas (47.5 / 47.0) que posteriormente se divulgaron en centésimas (comprobandose que los tiempos en décimas no eran manuales sino redondeo de los centesimales, 47.50 y 47.04). No se sabe si éstos eran eléctricos automáticos (en ese caso bastaría añadir la corrección IAAF de 0.05 seg. en vigor hasta 01.05.1971). Es decir:

Official times (results) published in tenths (47.5 & 47.0). Later they were published in hundredths (confirming that the tenths were not hand timing but rounding of the centesimal timing, 47.50 & 47.04). It is not sure that the timing of those hundredths were electric automatic. In this case it should be enough to add the IAAF amendment of 0.05 which ruled until 01.05.1971.

That is to say:

| | | | | | | |
|---|------------|---------|-------------|-----|--------|------------|

Tiempos oficiales publicados en décimas (56.4, 55.9 y 55.2) que posteriormente se divulgaron en centésimas (comprobándose que los tiempos en décimas no eran manuales sino redondeo de los centesimales, 56.38, 55.87 y 55.24). No se sabe si éstos eran eléctricos automáticos (en ese caso bastaría añadir la corrección IAAF de 0.05 seg. en vigor hasta

PROGRESIÓN DEL RÉCORD DE EUROPA EN PISTA CUBIERTA

01.05.1971). Es decir:

Official times (results) published in tenths (56.4, 55.9 & 55.2). Later they were published in hundredths (confirming that the tenths were not hand timing but rounding of the centesimal timing, 56.38, 55.87 & 55.24). It is not sure that the timing of those hundredths were electric automatic. In this case it should be enough to add the IAAF amendment of 0.05 which ruled until 01.05.1971. That is to say:

| | | | | | | |
